nanda nursing diagnoses definitions and classification 1992 A nursing diagnosis may be part of the nursing process and is a clinical judgment about individual, family, or community experiences/responses to actual or potential health problems/life processes. Nursing diagnoses foster the nurse's independent practice (e.g., patient comfort or relief) compared to dependent interventions driven by physician's orders (e.g., medication administration).

nanda nursing diagnoses definitions and classification 1992 NANDA Nursing Diagnoses: Definitions and Classification

### Medical classification, or medical coding, is the process of transforming descriptions of medical diagnoses and procedures into universal medical code numbers. The diagnoses and procedures are usually taken from a variety of sources within the health care record, such as the transcription of the physician's notes, laboratory results, radiologic results, and other sources.

### Medical classification - Wikipedia

nanda nursing diagnoses definitions and classification 1992 1. 2.

### APA (American Psychological Association) studies show that the incidence of eating disorders has increased under the last 30-40 years (4). Approximately 0.5 to 1 percent of women in the United States or older women meet the criteria for the diagnosis of anorexia nervosa.
