nathan ida engineering electromagnetics Abstract: Studies have shown that less than 50% of environmental surfaces in patient care rooms are properly cleaned and disinfected. Evidence strongly suggests that cross contamination of microorganisms from environmental surfaces is directly related to patient infections. High-touch surfaces such as bed rails, bed surfaces, tables, fluid poles, doorknobs, and supply carts have all been

nathan ida engineering electromagnetics In electromagnetism and electronics, inductance describes the tendency of an electrical conductor, such as coil, to oppose a change in the electric current through it. The change in current induces a reverse electromotive force (EMF). When an electric current flows through a conductor, it creates a magnetic field around that conductor. A changing current, in turn, creates a changing magnetic field ...
